- 6) ☐ Other: _____.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-32, drawn to a nucleic acid encoding a pesticidal fusion protein comprising a toxin domain and a heterologous binding domain, a method of making the nucleic acid, a vector comprising the nucleic acid, a method of using it to transform a cell or a plant and cells and plants thereby obtained.

Group II, claim(s) 33-37, drawn to a pesticidal fusion protein comprising a toxin domain and a heterologous binding domain, a method of making the protein, compositions comprising the protein and a method for using it to control pests.

Group III, claim(s) 38-40, drawn to a method of accessing the toxicity of a protein to a pest.

Group IV, claim(s) 41, drawn to an oligonucleotide.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There do not share a special technical feature.

The technical feature of groups I-III is a peptide that is toxic to pests. Murphy (1997, US 5,668,255) teaches fusion toxins comprising a toxin domain and a heterologous binding domain

Art Unit: 1638

and nucleic acids encoding those toxins (column 7, line 50, to column 14, line 44). Thus, claim 1, among others, is not novel and the technical feature shared by Groups I-III is not special.

The technical feature of Group IV is oligonucleotides; this technical feature is not shared by the other groups, and Group IV is not coextensive with any of Groups I-III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that for the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
